

## **Green Earth Building Group Pty Ltd**

Our farmhouse in Coondle was left in a damaged, dangerous and unsightly condition by a previous contractor. Work needed on it included structural work on roof joists to enable rectification of roof leaks, replacement of a ceiling, and unsightly gaps along the top of the external wall being covered by concrete liner boards and colourbond flashing.

Green Earth Building Group were a pleasure to deal with and did an excellent job under difficult circumstances. Their work was highly professional throughout and finished to an exceptional standard.

We would highly recommend Green Earth Building Group.

LEN & SUE ROBERTS-SMITH.
